

Gerry Canavan

"The Humanities after BLACKFISH"

ABSTRACT

This presentation begins with my recent experience teaching a research capstone course for English majors at Marquette titled "The Lives of Animals" (after the J.M. Coetzee novel). In particular I discuss the students' unexpected selection of the anti-Sea-World documentary BLACKFISH (dir. Gabriela Cowperthwaite, 2013) as a primary text in the course, and the animated, passionate discussions the film subsequently engendered. Part nature story, part journalistic expose, part science fiction, and part true crime documentary, BLACKFISH became a fascinating hinge point in the class as a whole, gesturing towards multiple possible futures for the relationship between humans and animals, the majority of them dominated by what one student in the class would later very memorably characterize in his student evaluation as "a mood of debilitating grief." As a paradigmatic text of the Anthropocene, BLACKFISH, and my students' critical and emotional responses to it, points towards the possibility of a humanities that might someday move beyond human-produced, human-centered narratives -- while at the same time positing a hard limit that might forever separate "us" from the animal lives around us who we adore, exploit, endanger, and enslave.

BIO

Gerry Canavan is an associate professor in the Department of English at Marquette University, specializing in twentieth- and twenty-first-century literature. An editor at *Extrapolation* and *Science Fiction Film and Television*, he has also co-edited *Green Planets: Ecology and Science Fiction* (2014) and *The Cambridge Companion to American Science Fiction* (2015) and *The Cambridge History of Science Fiction* (2018). His first monograph, *Octavia E. Butler*, appeared in 2016 in the *Modern Masters of Science Fiction* series at University of Illinois Press.
